

Dear Parents,

In the first Unit Of Inquiry- Who We Are- we, five graders, had so much fun. Along with celebrating the Fall Festival we did some awesome things as well. You could read below the summary of the previous five weeks of school 😊

MATH: During the first unit of inquiry, in our class, we focused on the review of what the girls already knew. Graphs, Patterns, Place value and rounding were covered again. Since in the UOI section the girls were about to learn about geography, so they needed to know about unit conversion and area as well. so they struggled their way through these two topics as well.

UOI: The girls explored the world during the first unit of inquiry. we first started learning about the GEOGRAPHY of Iran; Including its provinces, main cities, main landforms and climate, and then we moved to the continents and oceans. The girls seemed to love it. As a personal project they were each supposed to present all the could find about a particular country or city.

Language Art: In Language Art classes we cover different skills: Reading, Writing, Grammar and Vocabulary and Spelling. In the first unit of inquiry the girls learned about "Genre": Tall Tales. Formal and Informal language: Informal Letters. Parts of Speech: Nouns, Verbs, Adjectives and Adverbs. And they had vocabulary worksheets to help them with spelling.

ICT: During the sessions we've been to the computer lab, the girls have used MICROSOFT OFFICE software, and have practically learned how to use MS Word and PowerPoint more properly.

Field Trip:

In the first unit of inquiry, the five graders along with the six graders went on a field trip to an exhibition called "Zahedaneh". In this exhibition they learnt about Sistan and Baluchestan and the customs and traditions of this province of Iran. They had a chance to see the handy crafts of the area and to taste some of the local tea and cookie. They seemed to enjoy themselves while we were there.
