

“Who We Are” Newsletter

Math: We learned how to do long division and the concept of fractions.

We started cutting out shapes in the class and cutting them into smaller pieces in order to understand the concept of fractions better!

L.A: We learned about figurative language and how we use it in everyday life! We discussed metaphors, similes and alliteration!

We also discussed the concept of immigration and the difficulties one faces when going to a new country. The girls wrote creative stories and made posters and read them to the class!
