UOI:

We learned about energy and different types of energy

The girls did experiments with swirly paper to learn about heat energy! We also discussed potential and kinetic energy by playing with a ball in order to understand the concept better!

Math:

We learned about fractions and played games using fraction strips!

In order to understand fractions better the girls wore fraction crowns and compared fractions with each other 😊

The girls had lots of fun with their flower crowns

L.A:

We learned about connecting words and the girls wrote paragraphs using and/but/since and etc...

The End
