

Dear Parents,
April 28, 2019

We have come to the end of our Forth unit of inquiry which was:

“How the world works”

Central Idea:

HUMAN CHOICES IMPACT THE WORLD.

Lines of Inquiry:

1. Main forms of pollution
2. How recycling helps.
3. Sources of pollution.

In this unit we made a collage of what is polluting the environment. Trying to think of ways we can help the pollution and we drew pictures. We discussed how would feel on polluted days and what happens when the air is polluted. Also, we talked about the reasons we need to find ways to reduce/ stop pollution.

They watched videos about what is causing land, water and air pollution and how we can help. We explained how cars, houses and planes,, pollute the air.

In Math, we reviewed sequence of 2 digit numbers, measurement in Centimeters using a ruler and tracing on geometric shapes for our senior KG students and

Numbers and counters, colored beads and concept of addition for junior KG students.

In Language we reviewed tracing on letters, blending the sounds, reading and writing phonic sentences and matching phonic words with pictures.

Our beautiful girls performed very well on the stage and made us proud.

Students had the privilege to have the HEALTHY BREAKFAST day which was full fun for them and they enjoyed a lot. We would like to thank the parents who participated in that joyful event.
