

HOW WE ♥ ORGANIZE ♥ OURSELVES

Newsletter

UOI:

The students enjoyed our latest theme extremely! They had a chance to be very creative and independent by making their own businesses and having the chance to actually sell them to their classmates!

They all embraced this opportunity by being innovative about their business ideas and taking it to the next level!

They also visited university of Tehran for international student day and had a blast!

Math:

We worked on geometry and shapes.

It was a fairly new subject for the girls, they learned how to find perimeters of quadrilaterals and all sorts of triangles!

We also discussed concepts of symmetry and found symmetrical shapes around the classroom including our faces 😊

LA:

We learned how to write friendly letters and had a blast writing letters to our pen pal Jessica!
