

### ***Field Trip Report:***

***Location: Mahdavi educational complex***

*On Wednesday, December 5, we had a tour around the school. The purpose was getting familiar with different locations of our school. The children had a chance to visit Farsi kindergarten section and they got excited when they saw other KG students with the same uniform as their own.*

In another part of the school, they visited the ICT and each of them sat behind the computer desks.

We also visited the gym, they saw the students were playing basketball and they could stay for a short time.

Later we all experienced being inside the kitchen and it was before lunch time which the food was almost ready to be transferred to other parts of the school. They got the chance to say thank you and show their appreciation to the cooks inside the kitchen who were very friendly and welcomed to the students.

This tour around the school was a great experience for our KG students and they really liked it.
