

Fieldtrip Report - February 2019

Sad-Abad Complex – The Water Museum

Grade 3 – Unit 4

Where we are in place and time

Our visit to the water museum was an amazing experience for the students. Clean drinking water is so widely available today that many people take it for granted. In actuality, human beings have taken extensive measures throughout history to produce clean drinking water. At the museum, the students had the opportunity to take a look at this timeline.
