

Where We Are In Place And  
Time

# U.O.I

We finished unit 4 and we learned about structures, if they are man-made or natural, we learned how we can have strong and stable buildings.

We watched videos, read some files and made some bridge through this unit. We now know how we can set a door when making a building.

We covered this unit using:

- Videos
- Interactive Slides
- Hand-on projects

# Language Arts

In L.A we could cover half of the booklet, review the lessons from the very first lesson and wrote some writings on different topics.

We continued and could finish lesson 18.

Through this unit we worked a lot on our reading skills and learned some new words and put them into practice while playing 'pictionary'.

# Math

We finished the multiplication unit and moved further, we could start division too and now we are much better at problem solving.

We dived into Math 3B and finished division and now we know about geometry.

We can analyze different kinds of shapes, we know about various kinds of lines and we recognize polygons and angles.
